

Infrastructure Health & Incident Report

Host	h
Operating System	Not Available
Reporting Period	Last 1 Hour
Requested Window	a -> b
Available Historical Data	8/10/2026, 5:55:09 PM - 8/10/2026, 5:57:09 PM
Generated	8/10/2026, 5:57:09 PM
Generated By	System Administrator
Data Source	SQLite telemetry_history.db via /reports/data
Database	telemetry_history.db
Raw Samples	12
Report Points	2
Report ID	HMR-MSN7HW8T

1. Executive Summary

KPI	Value	Status
Overall System Health	Healthy	Healthy
Health Score	Not Available	-
Critical Alerts	0	healthy
Warning Alerts	0	healthy
Recovered Faults	0	-
Unresolved Faults	0	-
Recovery Actions	0	-
Data Coverage	50% (PARTIAL)	warning
Monitoring Duration	0	-

Host h - CPU averaged 2.50% (peak 3.00%); memory averaged 20.50%. Available telemetry covers - (50% of the requested period; 2 report points / 12 raw samples). Recorded faults: 0 critical, 0 warning (0 total); 0 recovery action(s); 0 recovered / 0 unresolved.

2. Historical Data Coverage

Coverage Status	PARTIAL
Requested Start	a
Requested End	b
Available Start	c
Available End	d

3. Component Health Overview

Component	Status	Avg	Peak	Min	Warn	Crit	Trend
CPU	healthy	2.50%	3.00%	2.00%	0	0	Stable
GPU	nodata	-	-	-	0	0	-
RAM	healthy	20.50%	21.00%	20.00%	0	0	Stable
DISK	nodata	-	-	-	0	0	-
NIC	nodata	-	-	-	0	0	-
IO	nodata	-	-	-	0	0	-

4.1 CPU HEALTH ANALYSIS

Status: Healthy

Avg: 2.50 Peak: 3 Min: 2 Trend: Stable Peak at: 8/10/2026, 5:57:09 PM Warnings: 0 Criticals: 0

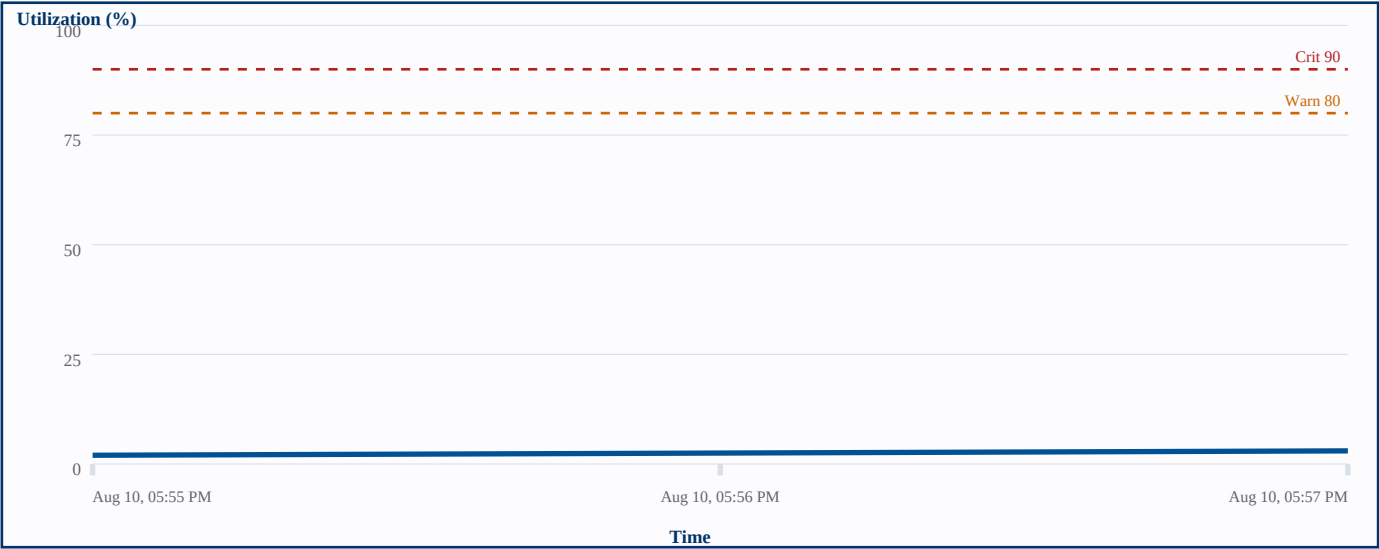

Latest Recorded Values

Metric	Value
Usage	3.00%
Temperature	-
Load 1m	-
User	-
System	-

Interpretation

CPU averaged 2.50% over the available window (min 2.00%, peak 3.00%). Peak occurred at 8/10/2026, 5:57:09 PM. Peak remained below the warning threshold ($\geq 80\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

CPU Utilization

4.2 GPU HEALTH ANALYSIS

Status: nodata

Avg: - Peak: - Min: - Trend: - Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Utilization	-
VRAM	-
Temperature	-
Power	-
Model	-

Interpretation

No historical GPU telemetry was available in SQLite for the selected reporting period.

No chartable historical series for this component in the available window.

4.3 RAM HEALTH ANALYSIS

Status: Healthy

Avg: 20.50 Peak: 21 Min: 20 Trend: Stable Peak at: 8/10/2026, 5:57:09 PM Warnings: 0 Criticals: 0

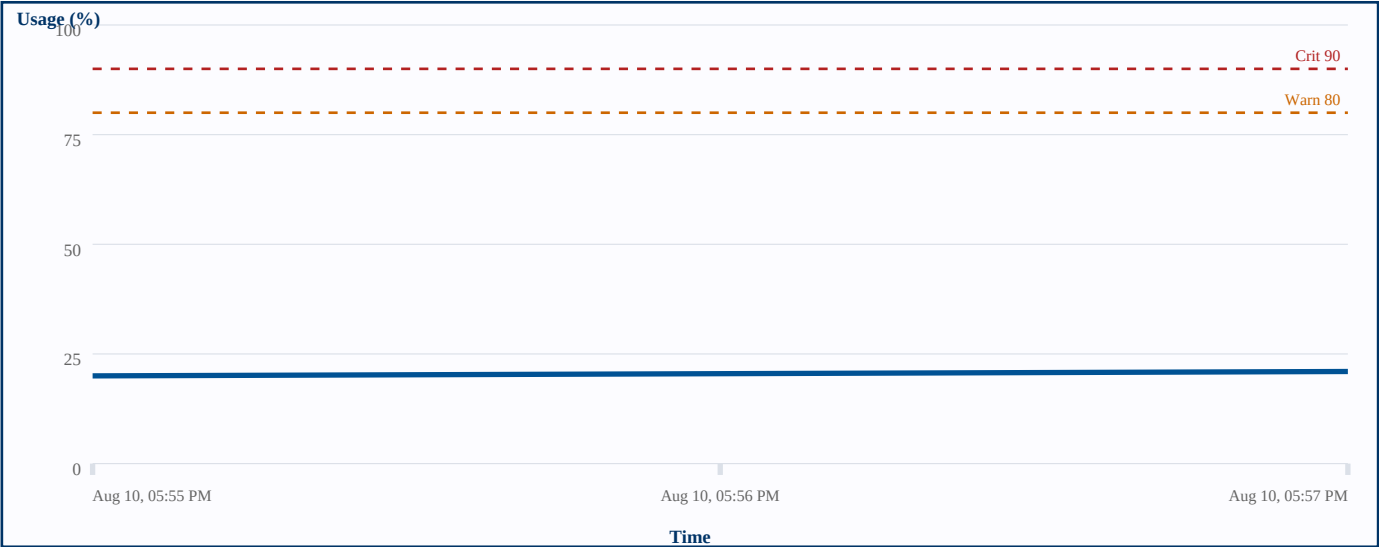

Latest Recorded Values

Metric	Value
Usage	21.00%
Available	-
Used	-
Total	-
Swap	-

Interpretation

RAM averaged 20.50% over the available window (min 20.00%, peak 21.00%). Peak occurred at 8/10/2026, 5:57:09 PM. Peak remained below the warning threshold (>=80%). No threshold spike or fault markers were correlated for this component. Trend: Stable.

RAM Usage

4.4 DISK HEALTH ANALYSIS

Status: nodata

Avg: - Peak: - Min: - Trend: - Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Busy	-
Throughput	-
IOPS	-
Latency	-
Queue	-
Device	-

Interpretation

No historical DISK telemetry was available in SQLite for the selected reporting period.

No chartable historical series for this component in the available window.

4.5 NIC HEALTH ANALYSIS

Status: nodata

Avg: - Peak: - Min: - Trend: - Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Utilization	-
RX	-
TX	-
Errors	-
Links Up	-

Interpretation

No historical NIC telemetry was available in SQLite for the selected reporting period.

No chartable historical series for this component in the available window.

4.6 IO HEALTH ANALYSIS

Status: nodata

Avg: - Peak: - Min: - Trend: - Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Throughput	-
IOPS	-
Queue	-
Latency	-
Device	-

Interpretation

No historical IO telemetry was available in SQLite for the selected reporting period.

No chartable historical series for this component in the available window.

5. Incident & Fault Log

No fault events were recorded in SQLite for this reporting period.

7. Recovery History

No recovery executions were recorded during this reporting period.

8. Digital Twin

No Digital Twin simulations were recorded during this reporting period.

9. Recommendations

Monitoring

- 1. Coverage is PARTIAL (50%): available window is - of - requested. Do not treat missing days as healthy.
- 2. Continue SQLite retention monitoring: 2 report points / 12 raw samples in this window.
- 3. No critical or warning component peaks required immediate action in the available historical window.

10. Appendix - Report Metadata

Generated At	2026-08-10T12:27:09.821Z
