

Infrastructure Health & Incident Report

Host	test
Operating System	Not Available
Reporting Period	Last 1 Hour
Requested Window	2026-08-10T11:35:19.174665Z -> 2026-08-10T12:35:19.174665Z
Available Historical Data	8/10/2026, 5:37:57 PM - 8/10/2026, 5:37:57 PM
Generated	8/10/2026, 6:06:15 PM
Generated By	smoke-test
Data Source	SQLite telemetry_history.db via /reports/data
Database	/Users/bhavanabaalebail/Downloads/fbl_temp-main 2/telemetry_history.db
Raw Samples	5
Report Points	1
Report ID	HMR-MSN7TL38

2. Executive Summary

KPI	Value	Status
Overall System Health	Healthy	Healthy
Health Score	90	-
Critical Alerts	0	healthy
Warning Alerts	0	healthy
Recovered Faults	0	-
Unresolved Faults	0	-
Recovery Actions	1	-
Data Coverage	0% (PARTIAL)	warning
Monitoring Duration	0s	-

Host test - CPU averaged 22.00% (peak 22.00%); memory averaged 40.00%. Available telemetry covers 0s (0% of the requested period; 1 report points / 5 raw samples). Recorded faults: 0 critical, 0 warning (0 total); 1 recovery action(s); 0 recovered / 0 unresolved.

3. Historical Data Coverage

Coverage Status	PARTIAL
Requested Start	2026-08-10T11:35:19.174665Z
Requested End	2026-08-10T12:35:19.174665Z
Available Start	2026-08-10T12:07:57.412636Z
Available End	2026-08-10T12:07:57.416898Z
Database Start	2026-08-10T09:43:28.305546Z
Database End	2026-08-10T12:07:57.416898Z
Requested Duration	1h 0m
Coverage Duration	0s
Coverage Percent	0%
Raw Samples	5
Report Points	1
Fault Events	0
Recovery Events	1
Digital Twin Records	0

Historical telemetry is available from 2026-08-10T12:07:57.412636Z onward. No telemetry was available in the database for the earlier portion of the requested reporting period.

4. Component Health Overview

Component	Status	Avg	Peak	Min	Warn	Crit	Trend
CPU	healthy	22.00%	22.00%	22.00%	0	0	Stable
GPU	nodata	-	-	-	0	0	-
RAM	healthy	40.00%	40.00%	40.00%	0	0	Stable
DISK	healthy	10.00%	10.00%	10.00%	0	0	Stable
NIC	healthy	5.00%	5.00%	5.00%	0	0	Stable
IO	healthy	5.00 MB/s	5.00 MB/s	5.00 MB/s	0	0	Stable

5.1 CPU HEALTH ANALYSIS

Status: **Healthy**

Avg: 22 Peak: 22 Min: 22 Trend: Stable Peak at: 8/10/2026, 5:37:00 PM Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Usage	22.00%
Temperature	50.00 degC
Load 1m	0.50
User	-
System	-

Interpretation

CPU averaged 22.00% over the available window (min 22.00%, peak 22.00%). Peak occurred at 8/10/2026, 5:37:00 PM. Peak remained below the warning threshold ($\geq 80\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

5.2 RAM HEALTH ANALYSIS

Status: **Healthy**

Avg: 40 Peak: 40 Min: 40 Trend: Stable Peak at: 8/10/2026, 5:37:00 PM Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Usage	40.00%
Available	8.00 GB
Used	-
Total	-
Swap	0.00%

Interpretation

RAM averaged 40.00% over the available window (min 40.00%, peak 40.00%). Peak occurred at 8/10/2026, 5:37:00 PM. Peak remained below the warning threshold ($\geq 80\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

5.3 DISK HEALTH ANALYSIS

Status: Healthy

Avg: 10 Peak: 10 Min: 10 Trend: Stable Peak at: 8/10/2026, 5:37:00 PM Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Busy	10.00%
Throughput	5.00 MB/s
IOPS	100
Latency	0.50 ms
Queue	1.00
Device	sda

Interpretation

DISK averaged 10.00% over the available window (min 10.00%, peak 10.00%). Peak occurred at 8/10/2026, 5:37:00 PM. Peak remained below the warning threshold ($\geq 25\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

5.4 NIC HEALTH ANALYSIS

Status: Healthy

Avg: 5 Peak: 5 Min: 5 Trend: Stable Peak at: 8/10/2026, 5:37:00 PM Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Utilization	5.00%
RX	1.00 Mbps
TX	1.00 Mbps
Errors	0
Links Up	-

Interpretation

NIC averaged 5.00% over the available window (min 5.00%, peak 5.00%). Peak occurred at 8/10/2026, 5:37:00 PM. Peak remained below the warning threshold ($\geq 10\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

5.5 IO HEALTH ANALYSIS

Status: Healthy

Avg: 5 Peak: 5 Min: 5 Trend: Stable Peak at: 8/10/2026, 5:37:00 PM Warnings: 0 Criticals: 0

Latest Recorded Values

Metric	Value
Throughput	5.00 MB/s
IOPS	100
Queue	1.00
Latency	0.50 ms
Device	sda

Interpretation

IO averaged 5.00 MB/s over the available window (min 5.00 MB/s, peak 5.00 MB/s). Peak occurred at 8/10/2026, 5:37:00 PM. Peak remained below the warning threshold (≥ 50 MB/s). No threshold spike or fault markers were correlated for this component. Trend: Stable.

6. Infrastructure Historical Trends

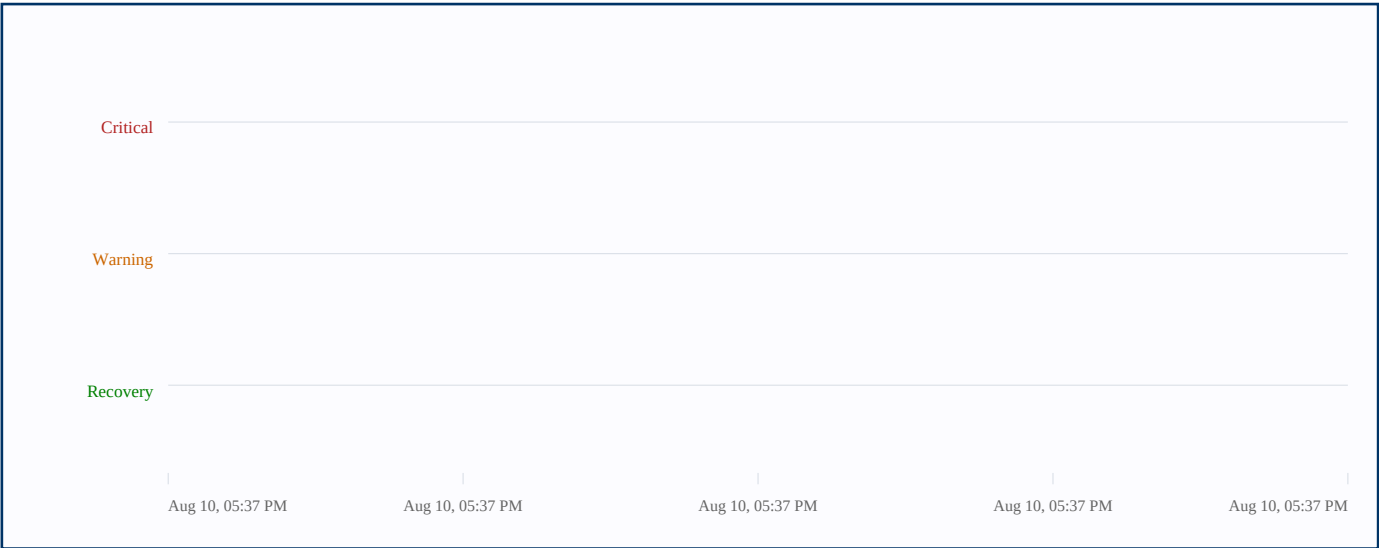

Historical telemetry, fault markers, and recovery markers for the selected reporting window. Lines break across telemetry gaps; missing intervals are not fabricated.

Fault Events Over Time

No warning or critical events were recorded during the selected reporting period.

Recovery Actions Over Time

8/10/2026, 5:56:15 PM | RA-001 | GPU | gpu.terminate_process | success

7. Fault & Incident Log

NO FAULT EVENTS RECORDED. No warning or critical fault events were recorded in the selected historical reporting period.

8. Recovery Action Log

Recovery ID	Timestamp	Component	Action	PID	Process	Result
RA-001	8/10/2026, 5:56:15 PM	GPU	gpu.terminate_process	4242	gpu-workload	success

Recovery ID	Trigger	Fault/Event ID	Verification	Final Status	Remarks
RA-001	Recorded recovery	Not available	process terminated	Completed	Recovery action recorded without a corresponding fault event

9. Fault -> Recovery Timeline

Recovery without linked fault (GPU)

-- Recovery Action: RA-001 gpu.terminate_process
-- Correlation: Recovery action recorded without a corresponding fault event in the selected historical fault table.
-- Verification: process terminated
-- Final Status: SUCCESS

Infrastructure Activity Timeline

8/10/2026, 5:56:15 PM | RECOVERY | GPU | RA-001: gpu.terminate_process

10. Significant Event / Spike Analysis

No significant threshold-related spikes detected in the selected historical reporting period.

11. Infrastructure Activity Summary

Category	Count	First Event	Last Event	Highest Sev	Recoveries	Result
Faults	0	-	-	None	0	No faults
Warnings	0	-	-	None	0	None
Criticals	0	-	-	None	0	None
Recoveries	1	2026-08-10T12:26:15.230Z	2026-08-10T12:26:15.230Z	Success	1	See recovery log
Significant Spikes	0	-	-	None	0	No significant spikes
Connectivity Events	0	-	-	None	0	Healthy / no events
Digital Twin Simulations	0	-	-	None	0	None

12. Digital Twin History

No Digital Twin simulations were recorded during this reporting period.

13. Recommendations

Monitoring

- Coverage is PARTIAL (0%): available window is 0s of 1h 0m requested. Do not treat missing days as healthy.
- Continue SQLite retention monitoring: 1 report points / 5 raw samples in this window.
- No critical or warning component peaks required immediate action in the available historical window.

14. Appendix - Report Metadata

Generated At	2026-08-10T12:36:15.236Z
Report ID	HMR-MSN7TL38
Report Interval	Last 1 Hour
Data Source	SQLite telemetry_history.db via /reports/data
Database	/Users/bhavanabaalebail/Downloads/fbl_temp-main 2/telemetry_history.db
Raw Samples	5
Report Points	1

Coverage Status	PARTIAL
Constraint	Missing historical periods are not fabricated or filled from live /metrics

Data Pipeline

TELEMETRY -> EVENT DETECTION -> FAULT -> RCA -> RECOVERY -> VERIFICATION -> STATUS

CM.py -> SQLite -> /reports/data -> Historical Analysis -> Report
