

Infrastructure Health & Incident Report

Host	rvu-ThinkStation-P2-Tower
Operating System	Not Available
Reporting Period	Last 1 Hour
Requested Window	2026-08-10T11:26:47.462Z -> 2026-08-10T12:26:47.462Z
Available Historical Data	8/10/2026, 5:16:47 PM - 8/10/2026, 5:56:47 PM
Generated	8/10/2026, 5:56:47 PM
Generated By	System Administrator
Data Source	SQLite telemetry_history.db via /reports/data
Database	telemetry_history.db
Raw Samples	291
Report Points	40
Report ID	HMR-MSN7HEZV

1. Executive Summary

KPI	Value	Status
Overall System Health	Healthy	Healthy
Health Score	100	-
Critical Alerts	0	healthy
Warning Alerts	0	healthy
Recovered Faults	0	-
Unresolved Faults	0	-
Recovery Actions	1	-
Data Coverage	66.67% (PARTIAL)	warning
Monitoring Duration	40m	-

Host rvu-ThinkStation-P2-Tower - CPU averaged 1.41% (peak 8.31%); GPU utilization peaked at 57.00% at 8/10/2026, 5:53:47 PM; memory averaged 21.90%. Available telemetry covers 40m (66.67% of the requested period; 40 report points / 291 raw samples). Recorded faults: 0 critical, 0 warning (0 total); 1 recovery action(s); 0 recovered / 0 unresolved.

2. Historical Data Coverage

Coverage Status	PARTIAL
Requested Start	2026-08-10T11:26:47.462Z
Requested End	2026-08-10T12:26:47.462Z
Available Start	2026-08-10T11:46:47.462Z
Available End	2026-08-10T12:26:47.462Z
Database Start	2026-08-10T09:40:07.462Z
Database End	2026-08-10T12:26:47.462Z
Requested Duration	1h 0m
Coverage Duration	40m
Coverage Percent	66.67%
Raw Samples	291
Report Points	40
Fault Events	0
Recovery Events	1
Digital Twin Records	0

Historical telemetry is available from midpoint onward.

3. Component Health Overview

Component	Status	Avg	Peak	Min	Warn	Crit	Trend
CPU	healthy	1.41%	8.31%	-0.99%	0.00	0.00	Falling
GPU	healthy	4.35%	57.00%	3.00%	0.00	0.00	Rising
RAM	healthy	21.90%	25.80%	18.00%	0.00	0.00	Rising
DISK	healthy	1.20%	1.20%	1.20%	0.00	0.00	Stable
NIC	healthy	0.20%	0.30%	0.10%	0.00	0.00	Stable
IO	healthy	0.80 MB/s	0.80 MB/s	0.80 MB/s	0.00	0.00	Stable

4.1 CPU HEALTH ANALYSIS

Status: Healthy

Avg: 1.41 Peak: 8.31 Min: -0.99 Trend: Falling Peak at: 8/10/2026, 5:52:47 PM Warnings: 0 Criticals: 0

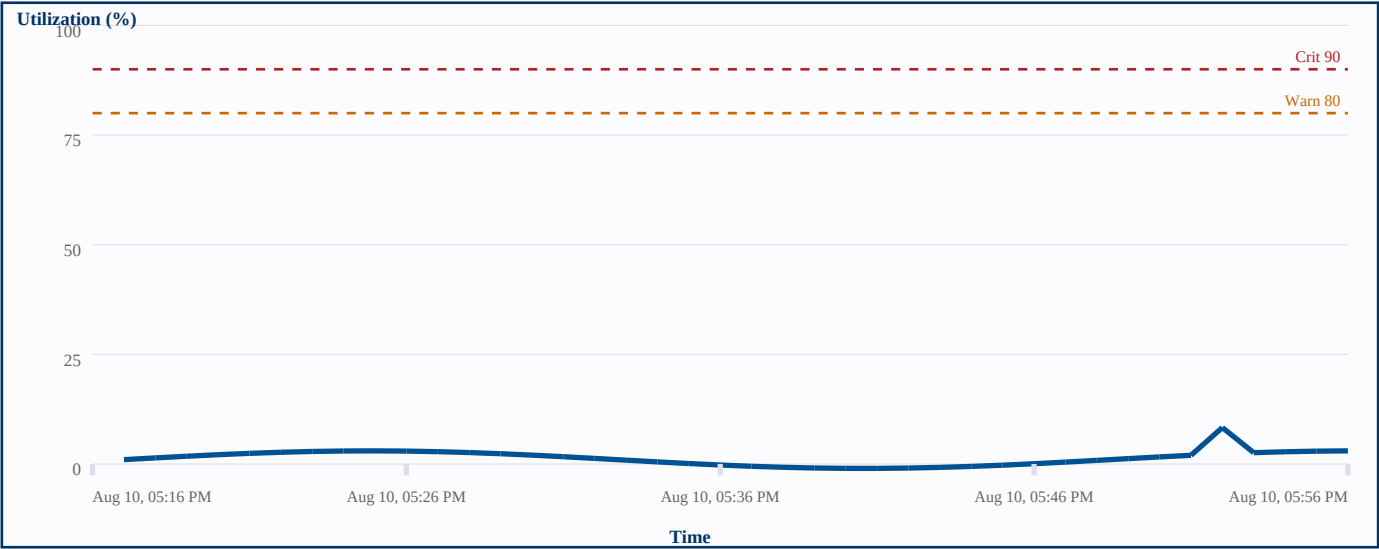

Latest Recorded Values

Metric	Value
Usage	3.00%
Temperature	49.00 degC
Load 1m	0.79
User	-
System	-

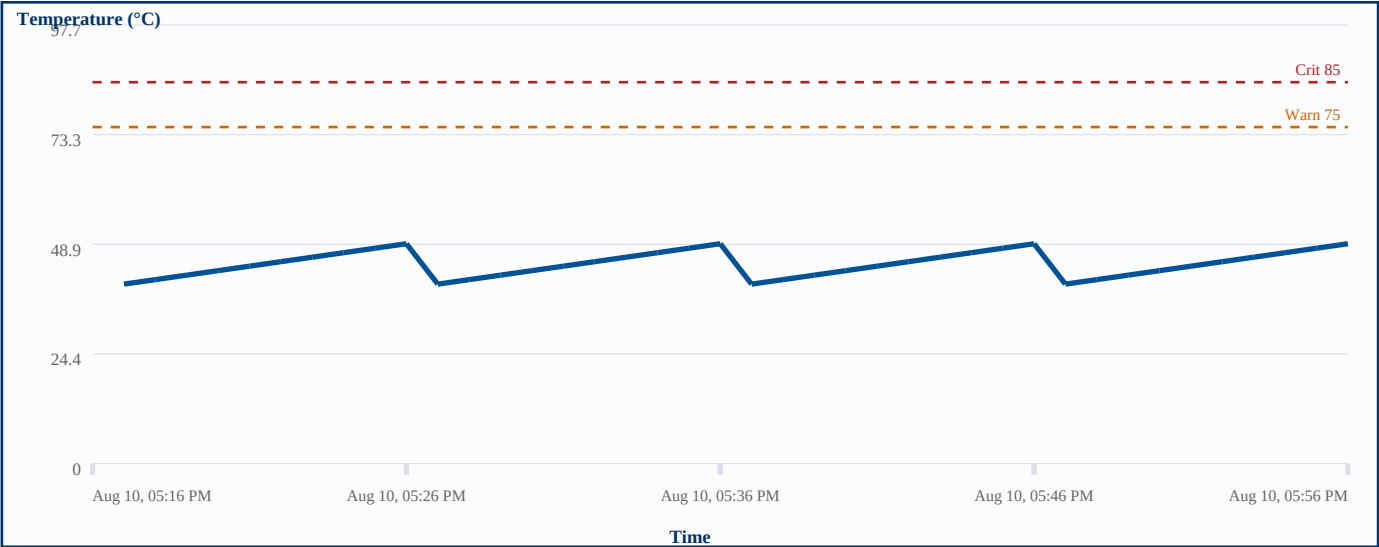

Interpretation

CPU averaged 1.41% over the available window (min -0.99%, peak 8.31%). Peak occurred at 8/10/2026, 5:52:47 PM. Peak remained below the warning threshold ($\geq 80\%$). No threshold spike or fault markers were correlated for this component. Trend: Falling.

CPU Utilization

CPU Temperature

4.2 GPU HEALTH ANALYSIS

Status: Healthy

Avg: 4.35 Peak: 57.00 Min: 3.00 Trend: Rising Peak at: 8/10/2026, 5:53:47 PM Warnings: 0 Criticals: 0

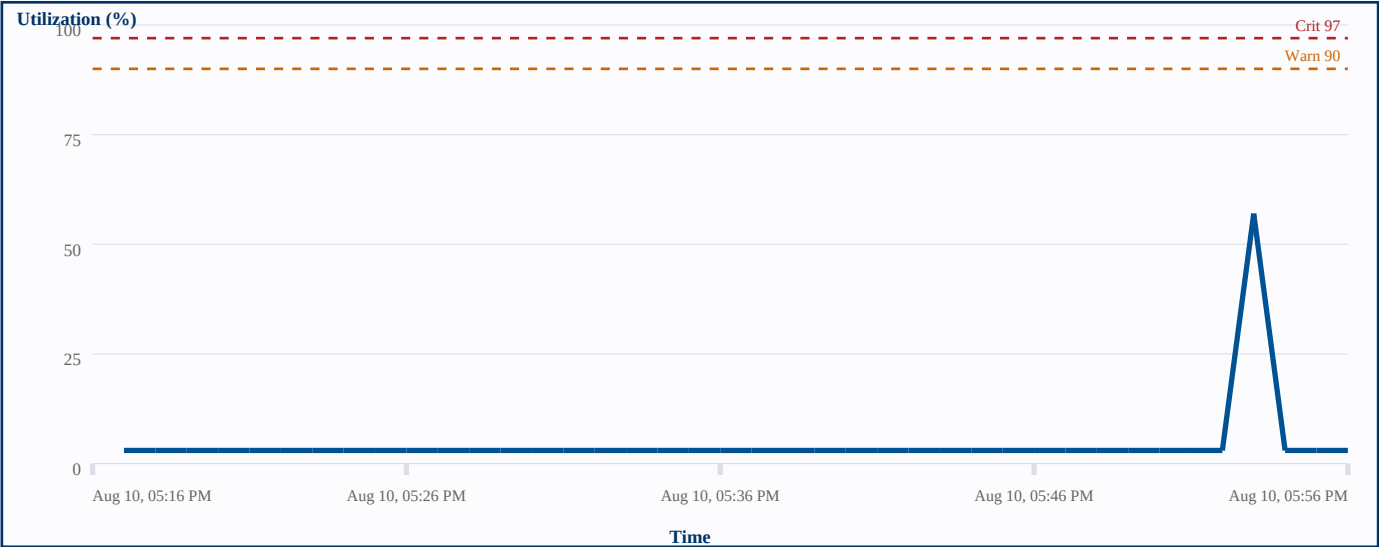

Latest Recorded Values

Metric	Value
Utilization	3.00%
VRAM	5.00%
Temperature	42.80 degC
Power	-
Model	NVIDIA GeForce RTX 4060

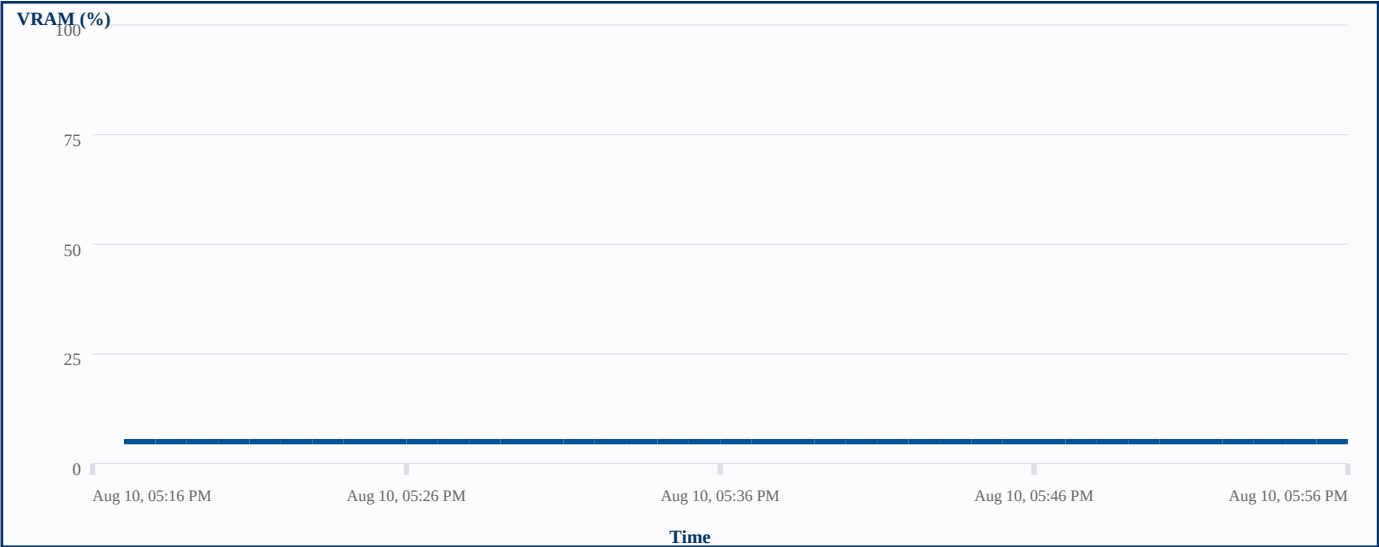

Interpretation

GPU averaged 4.35% over the available window (min 3.00%, peak 57.00%). Peak occurred at 8/10/2026, 5:53:47 PM. Peak remained below the warning threshold ($\geq 90\%$). No threshold spike or fault markers were correlated for this component. Trend: Rising.

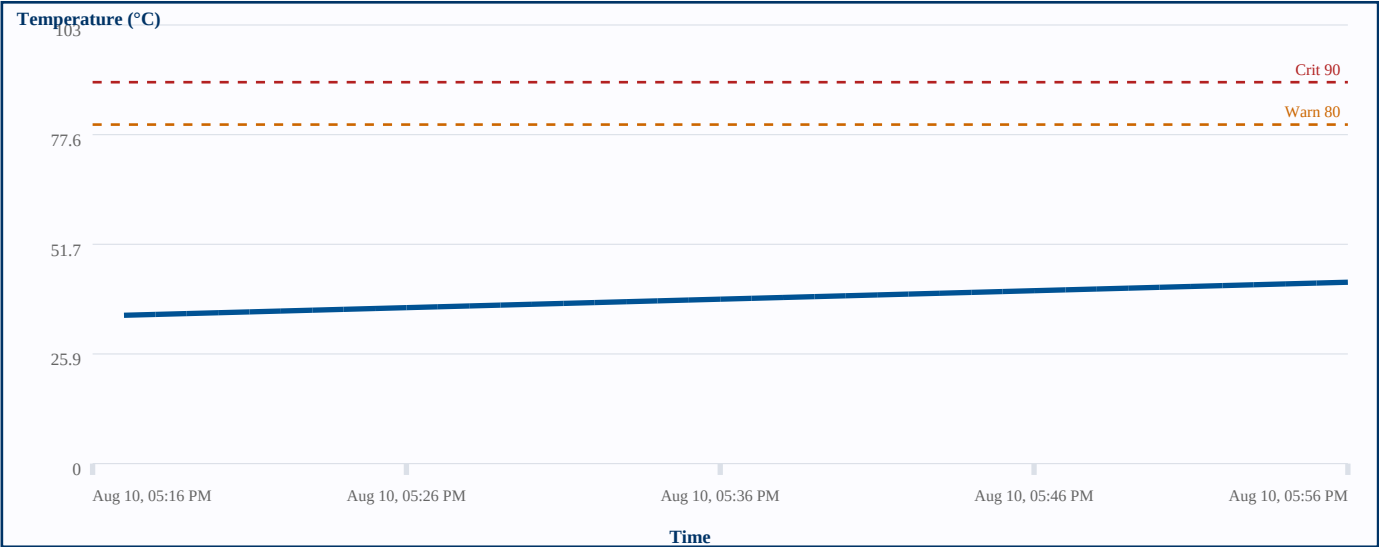

GPU Utilization

GPU VRAM Utilization

GPU Temperature

4.3 RAM HEALTH ANALYSIS

Status: Healthy

Avg: 21.90 Peak: 25.80 Min: 18.00 Trend: Rising Peak at: 8/10/2026, 5:56:47 PM Warnings: 0 Criticals: 0

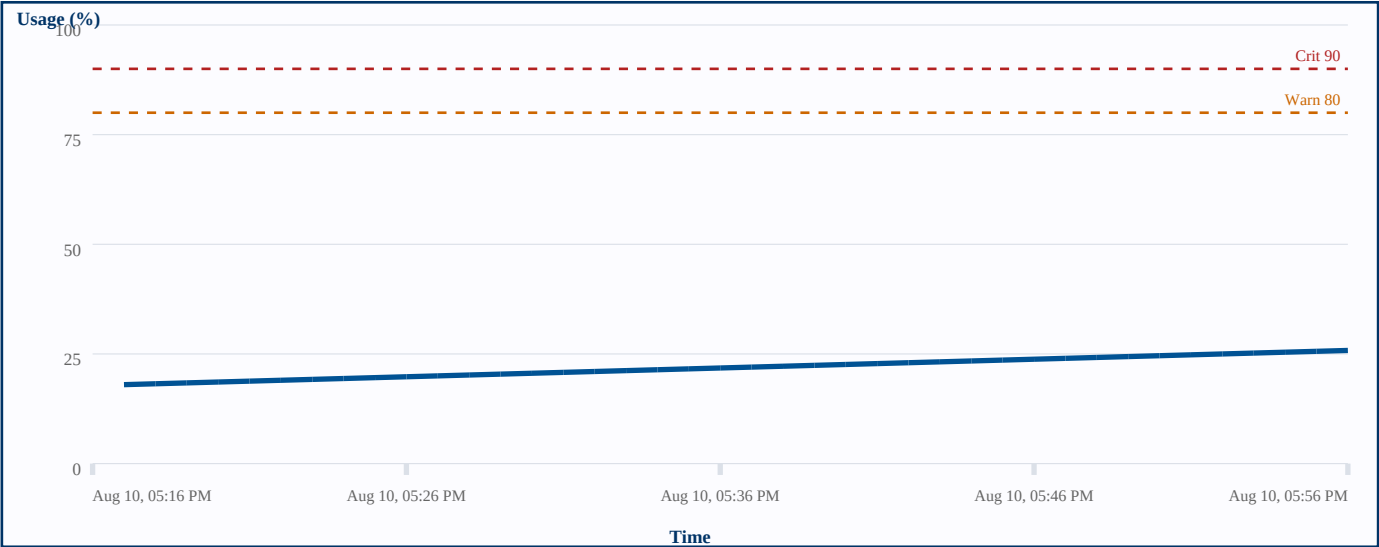

Latest Recorded Values

Metric	Value
Usage	25.80%
Available	11.22 GB
Used	-
Total	-
Swap	0.00%

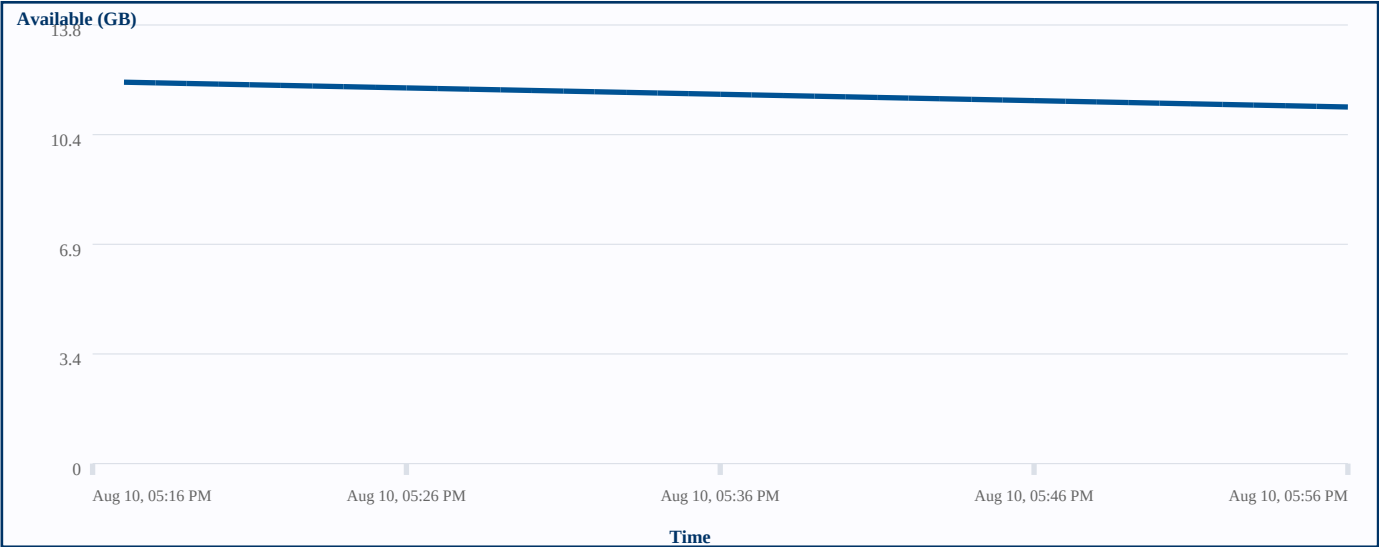

Interpretation

RAM averaged 21.90% over the available window (min 18.00%, peak 25.80%). Peak occurred at 8/10/2026, 5:56:47 PM. Peak remained below the warning threshold ($\geq 80\%$). No threshold spike or fault markers were correlated for this component. Trend: Rising.

4.4 DISK HEALTH ANALYSIS

Status: Healthy

Avg: 1.20 Peak: 1.20 Min: 1.20 Trend: Stable Peak at: 8/10/2026, 5:17:47 PM Warnings: 0 Criticals: 0

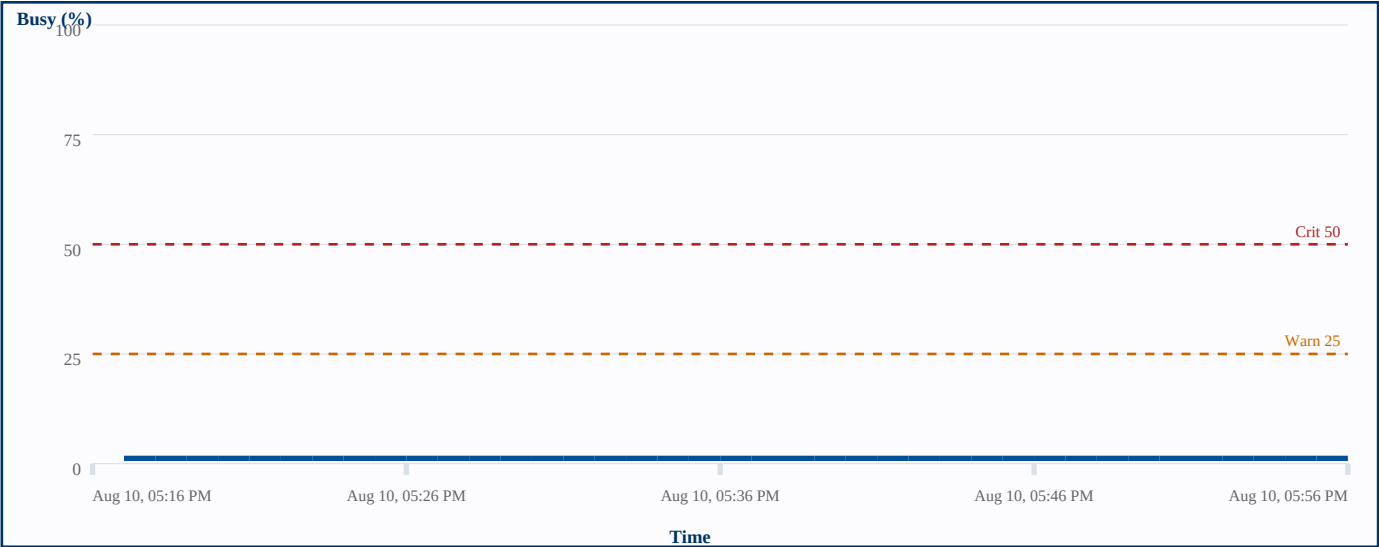

Latest Recorded Values

Metric	Value
Busy	1.20%
Throughput	0.80 MB/s
IOPS	20
Latency	2.50 ms
Queue	0.00
Device	nvme0n1

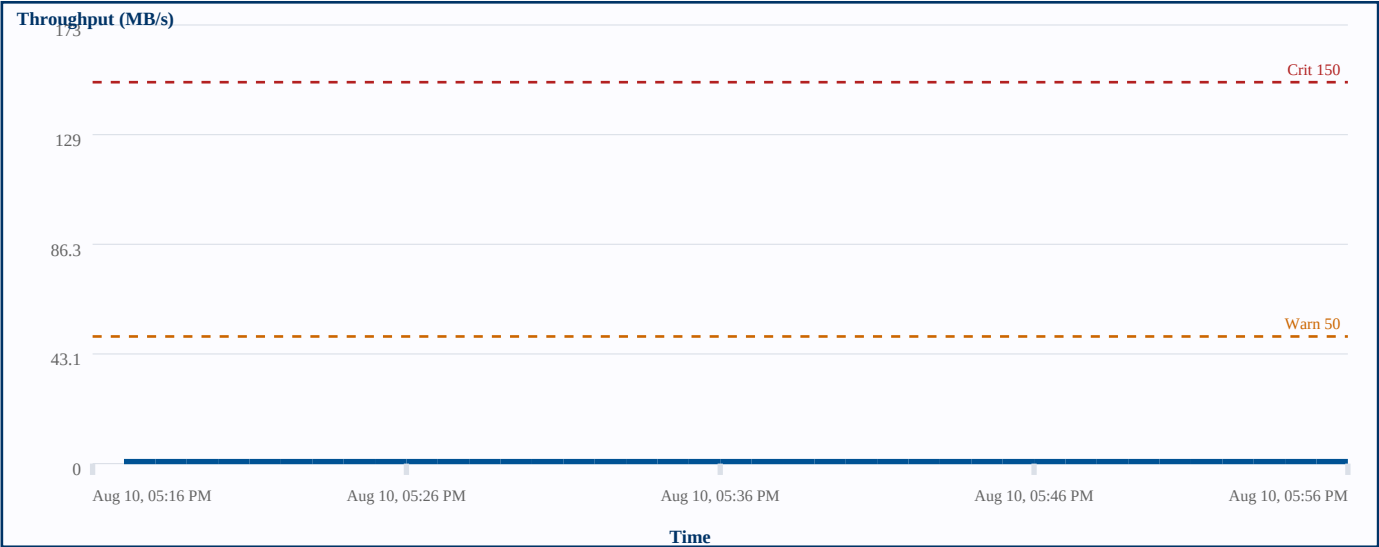

Interpretation

DISK averaged 1.20% over the available window (min 1.20%, peak 1.20%). Peak occurred at 8/10/2026, 5:17:47 PM. Peak remained below the warning threshold ($\geq 25\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

Disk Busy

Disk Latency

Disk Queue Depth

4.5 NIC HEALTH ANALYSIS

Status: Healthy

Avg: 0.20 Peak: 0.30 Min: 0.10 Trend: Stable Peak at: 8/10/2026, 5:21:47 PM Warnings: 0 Criticals: 0

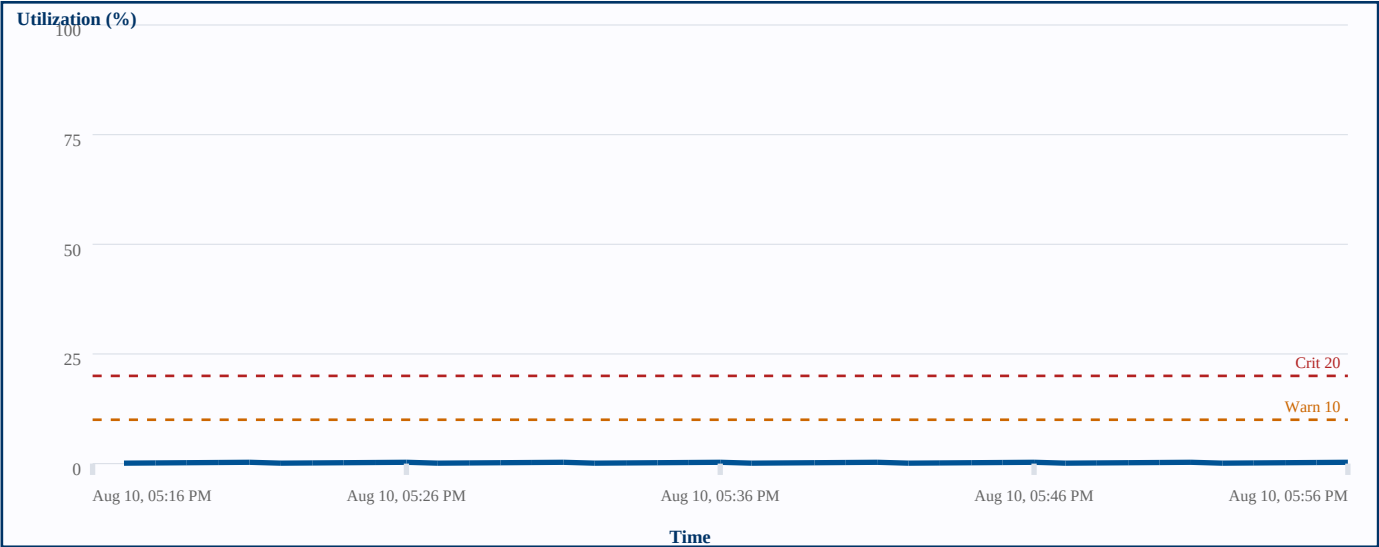

Latest Recorded Values

Metric	Value
Utilization	0.30%
RX	0.10 Mbps
TX	0.50 Mbps
Errors	0
Links Up	-

Interpretation

NIC averaged 0.20% over the available window (min 0.10%, peak 0.30%). Peak occurred at 8/10/2026, 5:21:47 PM. Peak remained below the warning threshold ($\geq 10\%$). No threshold spike or fault markers were correlated for this component. Trend: Stable.

NIC Utilization

NIC RX

NIC TX

4.6 IO HEALTH ANALYSIS

Status: Healthy

Avg: 0.80 Peak: 0.80 Min: 0.80 Trend: Stable Peak at: 8/10/2026, 5:17:47 PM Warnings: 0 Criticals: 0

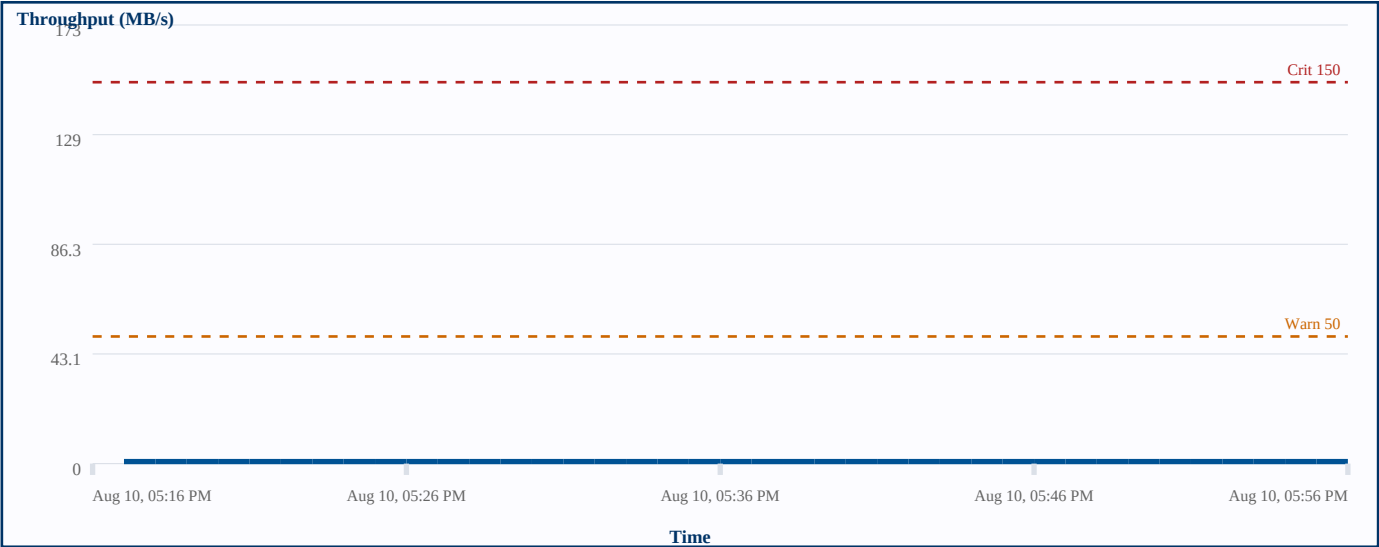

Latest Recorded Values

Metric	Value
Throughput	0.80 MB/s
IOPS	20
Queue	0.00
Latency	2.50 ms
Device	nvme0n1

Interpretation

IO averaged 0.80 MB/s over the available window (min 0.80 MB/s, peak 0.80 MB/s). Peak occurred at 8/10/2026, 5:17:47 PM. Peak remained below the warning threshold (≥ 50 MB/s). No threshold spike or fault markers were correlated for this component. Trend: Stable.

I/O IOPS

I/O Queue Depth

I/O Latency

5. Incident & Fault Log

No fault events were recorded in SQLite for this reporting period.

7. Recovery History

Time	Component	Action	PID	Process	Result	Status
2026-08-10 12:26:47	-	gpu.terminate_process	51973	process 51973	success	Completed

8. Digital Twin

No Digital Twin simulations were recorded during this reporting period.

9. Recommendations

Monitoring

- 1. Coverage is PARTIAL (66.67%): available window is 40m of 1h 0m requested. Do not treat missing days as healthy.
- 2. Continue SQLite retention monitoring: 40 report points / 291 raw samples in this window.
- 3. No critical or warning component peaks required immediate action in the available historical window.

10. Appendix - Report Metadata
